Emiliia Bodiu

Senior Product Manager

Barcelona, Spain · +34 655 423 344 · emiliabody0@gmail.com · linkedin.com/in/emilia-bodiu

SUMMARY

Senior Product Manager with 5 years of experience in health tech and wellness, owning hardware-integrated products (CGMs, at-home biomarker tests) and software end to end. Grew from Product Operations Manager to Senior PM, reporting to the CPO. Focused on activation, retention, adherence, and LTV through user journeys, internal tooling, and teams built from scratch. Works from both qualitative and quantitative data, brings compliance rigor to regulated environments, and can act when data is thin.

Recognition: Credited by Aspect Health's founder as head of product and operations and a key early hire, in a print feature for Forbes Moldova (May 2026) and in The Recursive (July 2026).

EXPERIENCE

Aspect Health (aspect-health.com), Delaware, USA (Remote). A platform for improving metabolic health through biomarker and lifestyle tracking, health coaching, education, and healthy grocery ordering. Its main audience is women with PCOS. Scaled from $300K to $3M ARR in six months in 2025, serving ~10,000 users.

Senior Product Manager, reporting to the CPO · Aug 2023 to Jul 2026

- Owned the roadmap across two mobile apps (iOS, Android), an admin platform, and a CMS, leading a 15-person cross-functional team. Kept the founders, engineering, clinicians, and external partners aligned on one prioritized sequence.
- Grew the audience from ~500 to ~10,000 active users and carried the 2025 scale-up to $3M ARR. Tested candidate audiences (PCOS, perimenopause, longevity, athletes) on conversion and later adherence with marketing, and made the bet on women with PCOS.
- Increased 4th-month retention 2 to 2.5x by replacing the 21-day program with long-term programs, supported by the PCOS protocol, the Aspect Scores glucose model, and coach SOPs.
- Owned the CGM experience across 4 sensor models and the wearable layer (Vital, Apple Health, Google Health), and moved the CGM from prescription-only to over-the-counter, halving unit cost from $70 to $35.
- Launched Aida, an AI dietitian that orders groceries from user health data through the Instacart partner API. Shipped an AI health coach for coach-free programs, which cut response time and cost per user.
- Built the product analytics foundation: Amplitude instrumentation, BigQuery, and Tableau dashboards.
- Ran continuous discovery via user interviews and turned qualitative and behavioral signals into prioritized PRDs and go/no-go calls.
- Led the in-app PCOS educational protocol with clinicians (ObGyns, MDs, medical writers), ran a clinical case study with Mira Care submitted to Frontiers in Medicine, and delivered a partner webinar with PCOS Challenge.

Product Operations Manager · Oct 2021 to Aug 2023

- Rebuilt CGM onboarding end to end (prescription, doctor approval, fulfillment, plus a coach-facing intake step), replacing a stalled semi-manual process and lifting completion to 80-90% and coaching satisfaction (NPS).
- Automated CGM operations across the doctor's office and pharmacy, with admin-panel status visibility for CS, engineering, and coaching.
- Partnered with engineering to stabilize and ship core features (coach chat, call booking, glucose and meal scores) through bug-fixing and QA.
- Grew the health-coaching team from 0 to 3 and built coaching-quality analytics (response time, satisfaction) into the admin panel.

Private Tutoring Business, Remote (self-employed). A solo business providing chemistry and biology tutoring for school-leaving exams, university admissions, and university-level courses.

Founder & Private Tutor (solo business) · Dec 2018 to Jul 2021

- Retained 98% of students past the paid trial by designing it as an onboarding step: assess the student's level, then present an individual study roadmap. 35% of admissions-prep students won full scholarships to top universities.
- Founded and ran the business solo for ~2.5 years, serving 30–45 students end to end: acquisition (tutoring platform, ads, word of mouth), pricing, scheduling, delivery, and payments.
- Tripled rates from ~$10/hr to $25–30/hr while sustaining 15–20 concurrent students and 35–45 teaching hours/week; referrals drove ~20% of new students from year 2.
- Built the delivery system from scratch — own curriculum, video courses, custom problem sets, and progress tracking — supporting 2–3 classes/week per student with weekly and monthly results reviews.

EDUCATION

Sechenov University, Bachelor of Pharmacy (BPharm), Pharmaceutical Sciences & Administration · Sep 2018 to Jun 2023. Focus: pharmacology, clinical research, evidence-based medicine, and regulatory compliance.

SKILLS & TOOLS

Product: continuous discovery & user interviews · PRDs / user stories / acceptance criteria · roadmap & prioritization (ICE) · opportunity assessment · competitive research & analysis · proof-of-concept (PoC) sprints · KPI / OKR definition · Agile · Scrum

Data & experimentation: Amplitude · BigQuery · Tableau (built product & marketing dashboards from scratch with a data analyst) · SQL (basic/working) · A/B testing (VWO) · CRO · landing page experimentation · analytics instrumentation

Lifecycle & ops: Stripe · Intercom · Zendesk · Airtable (used as CRM) · Klaviyo · Mailchimp

AI & automation: Claude · Gemini · Perplexity · Elicit (AI-assisted scientific-literature analysis) · OpenAI API · OpenRouter · Codex · Langfuse (LLM response evaluation) · n8n · Zapier · Vercel

Product scope: hardware / CGM integration · wearable & health-data integrations (Vital, Apple Health, Google Health) · AI / LLM product features

Delivery & leadership: cross-functional & clinical-team leadership · hiring & team building · QA / release testing
